CAREER OBJECTIVE

- To build a strong career in a growth-oriented organization where I can apply my skills in Machine Learning, Computer Vision, and Python Development while continuously learning and contributing to impactful projects.

ACADEMIC QUALIFICATIONS

- B. TECH in CSE (DATA SCIENCE) from Avanthi Institute of Engineering & Technology, JNTU-GV, Narsipatnam, A.P CGPA: 8.08 (2022–2026)
- Intermediate (MPC) from, Govt Junior College Narsipatnam Percentage 78.9% (2020–2022)
- SSC from Govt, Z.P.H School Percentage 98% (2019–2020)

SKILLS

- Programming Languages:** Python Programming, C Programming, HTML, CSS, SQL
- Frameworks & Tools:** NumPy, Pandas, Matplotlib.
- Technical Skills:** Machine Learning, Deep Learning, Computer Vision, Data Preprocessing, Data Visualization.
- Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability.

INTERSHIPS

Full stack Python Developer Internship

- Gained hands on experience in front-end and back-end web developing using Python, Django, HTML, CSS, JavaScript & MySQL.
- Built and deployed responsive web applications integrating both client-side and server-side functionalities.
- Learned and implemented concepts of REST APIs, database management, and version control (Git).
- Worked on industry-level projects under the guidance of mentors through the AICTE Eduskills Virtual Internship Program.

AI-ML Virtual Internship

- Built a strong foundation in machine learning by mastering data preprocessing, supervised and unsupervised learning models, as well as CNNs, RNNs, and techniques for object detection and image classification.
- Built and optimized CNNs in TensorFlow for high accuracy Image Classification and Object Detection, leveraging Transfer Learning.

PROJECTS

Vehicle Number Plate Detection & Recognition using Computer Vision and Deep Learning

- Developed a Vehicle number plate detection and recognition system using Python, OpenCV, Deep learning techniques.
- Implemented image preprocessing techniques such as Grayscale conversion, Noise reduction, and Edge Detection.
- Applied OCR techniques to extract alphanumeric characters from number plates.
- Achieved reliable detection performance on various vehicle images under different lighting conditions.

ACHIEVEMENTS & CERTIFICATIONS

- **Event:** Hackathon Organized by Institution's Council (IIC), AIET
- **Certifications:** Smart Attendance Tracking System, Data Science Math Skills – Duke University (via Coursera)
- **Description:** Designed and developed a web-based attendance tracking system accessible by Principals, staff and HOD's allowing for real time monitoring of attendance data.
- **Text to Voice Converter:** Developed project allowing 200+ users to convert voice to text.
